### This Year's Beneficiary

Brooklyn Hostetter is 6 years old from New Waterford, diagnosed with Hypoplastic Left Heart Syndrome two days after birth. The left side of her heart is underdeveloped and nonfunctional. There is no cure. Palliative treatment involves 3 open heart surgeries, lifetime medications, routine and corrective cardiac catheterizations, and a feeding tube. These interventions are meant to give her quality of life and allow her to survive into adulthood. Eventually, Brooklyn will be faced with heart transplantation.

A portion of the money raised plus donations, benefits a young person with financial help for medical costs.
